Total Defence In The UK

- **Mission:**
 - “Total defence: Building armed forces that fight battles and societies that fight wars.”
- **Methodology:**
 - “Some people sell secrets. We sell secrecy.”
- **Website:**
 - <https://secrecyone.co.uk>

Total Defence In The UK

- **Location:**
 - Phase 1: Manchester, UK | Phase 2: Sweden
- **Core stakeholders:**
 - The British and Swedish Armed Forces, from initial startup of the project and all its related workstreams
- **Core clients with influence re outputs:**
 - Core stakeholders plus, in successive stages, other agencies and organisations of the UK and Sweden's choosing
- **Core clients with no influence but access to outputs:**
 - To be confirmed by the Core stakeholders only
- **Tech partners:**
 - European HQ-ed only (including the UK)
- **Social partners:**
 - European HQ-ed only (including the UK)

Cybercrime To Cyberwarfare | The UK Today

- The criminal hack of Jaguar Land Rover (JLR) in late August 2025 is an ongoing challenge for the company:
 - <https://secrecyone.co.uk>
- Since then, AI has become an unforgiving penetrative tool in corporate networks, 80 percent of which already had bad actors nestled inside and waiting to pounce for years.

Cybercrime to Cyberwarfare
= *everyone's problem*

Cybercrime To Cyberwarfare | The UK Today

- Two sectors of our society are suffering:
 - Corporates.
 - Citizens and small & medium-sized businesses.
- We propose two solutions: both deliverable in a matter of months.
- What they do need is national and regional government consent.

Cybercrime to Cyberwarfare
= *everyone's* problem

From a Nordic-inspired **Total Defence** to a fully rethought **UK Total Defence** = *everyone's* solution

“Total Defence”
in the UK:
The Lead-In

Cybercrime To Cyberwarfare | The UK Today

- Why government consent?
- We're talking about introducing new, highly cost-effective, defence doctrines for the whole nation's safety and security, into the foreseeable future, in a world of increasing online and digital criminality: warfare on the citizens and our livelihoods, in fact.
- And we at **Secrecy One Ltd** don't want anyone left behind.

= *everyone's problem*

From a Nordic-inspired **Total Defence** to a fully rethought **UK Total Defence** = *everyone's solution*

**“Total Defence”
in the UK:**
The Lead-In

Cybercrime To Cyberwarfare | The UK Today

- This means consensus is key to achieving a rapid and effective nationwide capability to fight Russia – as well as our many other geopolitical enemies – at all levels of society: civil and military, both.
- Leaving no one behind.
- Which is why we want government fully onboard.

Cybercrime to Cyberwarfare
= *everyone's problem*

From a Nordic-inspired **Total Defence** to a fully rethought **UK Total Defence** = *everyone's solution*

**“Total Defence”
in the UK:**
The Lead-In

Cybercrime To Cyberwarfare | The UK Today

- Because the situation is going to get worse for us all.
- Even if we quickly change what we do.
- We need to change two things that all of us do badly at the moment, sometimes without realising we are, to make sure this situation doesn't deteriorate irretrievably:
 - **How we defend corporate networks** – this needs to be done more effectively and rationally than at the moment.
 - **How**, in a world where hybrid, asymmetrical and cyber criminality are fast becoming three types of warfare on us all, wherever we live and work, **we defend ordinary citizens and small & medium-sized businesses from an extreme**, currently unseen and ongoing, **data theft and digital robbery**.

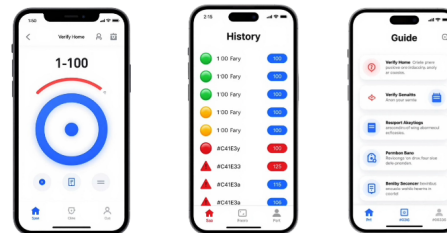

Cybercrime To Cyberwarfare | The UK Today

- **Solution 1:**

- **Verify Home**, a tool we can quickly implement:
 - <https://secrecyone.co.uk/dev/vid/three>
 - A **Go-To-Market product in five months** from Design to Coding and User-Delivery, including the full Testing and Quality Control processes.
 - For **citizens like you and me**, our small and medium-sized businesses, and the families and friends we want to protect, so we can learn how to defend ourselves from extreme online and digital criminality.

Cybercrime To Cyberwarfare | The UK Today

- **Solution 2:**

- **Verify Plus**, a tool we can implement in less than a year from start to finish:

- <https://secrecyone.co.uk/verify/plus>
 - A Go-To-Market product in 10 months from Design to Coding and User-Delivery, including the full Testing and Quality Control processes.
 - For CISO and other mission-critical responsables whose workplaces are corporate environments with long-term investments in heavy IT infrastructures, now under unrelenting attack from a highly penetrative AI.

VERIFY PLUS | *FOR CISO CHANGE
MAKERS WHO SECURE HYBRID IT*

Total Defence In The UK

- But first we need **national and regional government to come onboard and consent to the doctrine of a Total Defence**, adapted sensitively to the local and very specific needs of **existing and future UK national security doctrines**.
- Because we can **harden the military, security, and law-enforcement infrastructures all we want with US-made tools and sovereignty-antagonistic legal structures**, but we cannot defend **our citizens** – including our business-people in companies of all sizes – from an **increasingly destructive, and often nation-state delivered, extreme online and digital criminality**.

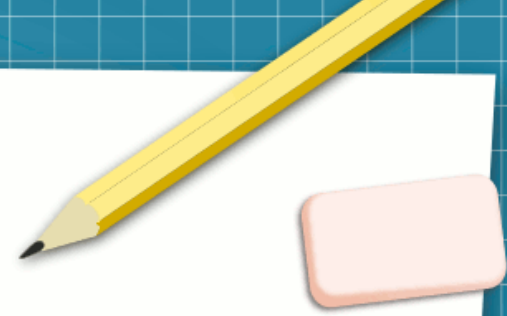

Total Defence In The UK

- To **defend our nation from all-comers**, we need to accept that such a defensive capability has to be **evident at all levels of society**,
and in respect of **social networks** and our younger people, **not just the over-18s but the under-18s too**.
- No one left behind.
